# INTERNATIONAL GCSE CHEMISTRY

Paper 1

Monday 4 November 2019 07:00 GMT Time allowed: 1 hour 30 minutes

### Materials

For this paper you must have:

- a pencil and a ruler
- a scientific calculator
- the Periodic Table (enclosed).

### Instructions

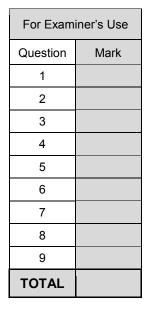

- Use black ink or black ball-point pen.
- Fill in the boxes at the top of this page.
- Answer all questions.
- You must answer the questions in the spaces provided. Do not write outside the box around each page or on blank pages.
- If you need extra space for your answer(s), use the lined pages at the end of this book. Write the question number against your answer(s).
- Do all rough work in this book. Cross through any work you do not want to be marked.
- Show all your working.

### Information

- The marks for questions are shown in brackets.
- The maximum mark for this paper is 90.
- You are expected to use a scientific calculator where appropriate.
- A Periodic Table is provided as a loose insert.

	Answer <b>all</b> questions in the spaces provided.					
0 1	his question is about polymers.					
	Figure 1 shows molecules that join together to produce a polymer.					
	Figure 1					
	$\begin{array}{cccccccccccccccccccccccccccccccccccc$					
01.1	How many <b>different elements</b> are in the molecules in <b>Figure 1</b> ? [1 mark]					
01.2	What is the name of molecules that join together to produce a polymer?					
	Tick (✓) one box. [1 mark]					
	Alkanes					
	Fullerenes					
	Monomers
