

# Movement and position

## Mark Scheme 1

<b>Level</b>	IGCSE(9-1)
<b>Subject</b>	Physics
<b>Exam Board</b>	Edexcel IGCSE
<b>Module</b>	Double Award (Paper 1P)
<b>Topic</b>	Forces and motion
<b>Sub-Topic</b>	Movement and position
<b>Booklet</b>	Mark Scheme 1

**Time Allowed:** 62 minutes

**Score:** /51

**Percentage:** /100

**Grade Boundaries:**

A*	A	B	C	D	E	U
>85%	775%	70%	60%	55%	50%	<50%

Question number	Answer	Notes	Marks
1 (a)	B – the horizontal part of the line;		1
(b)	A – the area under the line;		1
(c)	B – the distance moved divided by the time taken;		1

Total 3 marks

Question number	Answer	Notes	Marks
2	<p>Any 5 of</p> <ol style="list-style-type: none"> <li>1. determine / measure distance;</li> <li>2. determine / measure time;</li> <li>3. Appropriate measuring instrument for distance <b>OR</b> time;</li> <li>4. Use a suitable distance /count laps (of known length);</li> <li>5. repeat experiment/<b>calculate</b> average;</li> <li>6. Speed = distance / time OR finding the gradient ;</li> <li>7. Suitable experimental precaution, e.g. reaction time considered, consistent height on track, time from a predetermined consistent point;</li> </ol>	<p>Allow</p> <p>idea of published track length</p> <p>use of split times</p> <p>e.g. 1 lap or circuit</p> <p>Ignore 'human error'</p>	5
		<b>Total</b>	<b>5</b>

Question number	Answer	Notes	Marks
3 (a) (i)	42 (m/s)	Allow range 42 - 43	1
(ii)	Attempt to calculate slope; Answer; Unit;  $42 \div 15$  2.8  $\text{m/s}^2$	Allow value from (i) e.g. $43 \text{ m/s} \rightarrow 2.9 \text{ m/s}^2$ $42.5 \rightarrow 2.83 \text{ m/s}^2$ $45 \rightarrow 3 \text{ m/s}^2$  not $42/120$ allow $42/20$	3
(iii)	Attempt to calculate an area under graph line; Appropriate further working (e.g. adding areas); Answer;  $(\frac{1}{2} \times 15 \times 42) + (80 \times 42) + (\frac{1}{2} \times 25 \times 42)$  $315 + 3360 + 525$  4200 (m)	Allow value from (i) e.g. $43 \text{ m/s} \rightarrow 4300 \text{ m}$  first 2 MP may be gained using the trapezium method, i.e. $42 \times (120+80)/2$  Bald correct answer scores 3	3

Question number	Answer	Notes	Marks
(b)	Any <b>three</b> from 1. Stopping distance affected by speed or mass; 2. For faster plane, stopping distance greater/ runway too short ; 3. for heavier plane stopping distance greater/ runway too short; 4. Attempt to calculate stopping distance from graph; 5. Data shows most/all of runway already used;	ignore time = $500/40$  Allow a momentum argument for MP1, 2, 3	3
		<b>Total</b>	<b>10</b>

Question number	Answer	Notes	Marks
4 (a) B D	constant velocity of <u>5 m/s</u>  Idea that velocity/speed = 0	Allow speed is <u>5 m/s</u>  Allow "stops", "stationary", "at rest"	2
(b)	Idea of greater slope (for stage E); e.g. the gradient is steeper	Allow reverse argument, provided stage A is identified e.g. "stage A has a shallower slope"  Allow attempts to demonstrate through - calculation of both gradients - qualitative comparison of data	1
(c)	distance = speed × time OR distance = area under graph; attempt to find any area; attempt to total correct areas (or use trapezium method); evaluation; e. distance = area under graph $7 \times 7$ or $\frac{1}{2} \times 7 \times 3$ $(7 \times 7) + (\frac{1}{2} \times 7 \times 3) = 49 + 10.5$ 59.5 (m)	The correct relationship can be <b>implicit</b> in the working  59.5 (m) with no working = full marks  Allow the trapezium method - e.g. $7 \times ((7+10) \div 2) = 7 \times 8.5$ = 59.5 (m)	4
(d)	Correct equation shown ; e.g. (average speed) = distance (moved) / time (taken)  Substitution of correct distance and suitable time; Correct evaluation ; e.g. $106.5/27$ 3.94 (m/s)	Allow d/t    Allow (ecf) max 2 4.26 (m/s) (use of time = 25 s) 3.55 (m/s) (use of time = 30 s) Allow reverse argument max 2 e.g. $106.5 \div 4 = 26.6$ (s)	3

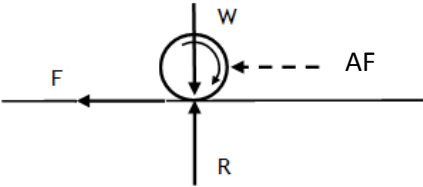

Question number	Answer	Notes	Marks
5	<p>Any FOUR of</p> <p>Reaction time of driver (inc comment on drink/drugs / driver paying attention / driver distracted /driver tired);</p> <p>Condition of car's brakes/force applied to brakes; Condition of car's tyres; Condition of road surface (inc ice/water/mud /friction ideas);</p> <p>Stopping distance of car;</p> <p>Velocity / speed / behaviour of rabbit (across road);</p> <p>Distance of rabbit from car;</p> <p>Visibility factor (e.g. fog / dirty windscreen);</p> <p>ALLOW MAXIMUM of TWO from these</p> <p>Kinetic energy of car; Momentum of car; Velocity / speed of car; Mass / weight of car / number of passengers;</p>	<p>ACCEPT 'thinking distance / time' as an alternative to these points IGNORE 'condition of driver'</p> <p>ACCEPT 'braking distance (of the car)' as an alternative to these three 'condition' points IGNORE 'condition of car'</p> <p>i.e. momentum of car <u>and</u> velocity of car <u>and</u> mass of car only scores two of the marks available</p>	4

Total 4 Marks

Question number	Answer	Notes	Marks
6 (a) (i)	6.1 (m);		1
(ii)	any two from: - MP1. (on distance-time graph,) flat line means zero speed / eq MP2. (so) count when slope is zero; MP3. 7 (times);	allow flat or horizontal for zero slope	2
(b) (i)	(average) speed = $\frac{\text{(total) distance moved}}{\text{(total) time taken}}$	allow defined symbols ignore 'triangles'	1
(ii)	Substitution; Calculation; Matching unit;  e.g. Average speed = $\frac{6.1}{(7 \times 60)}$ = 0.0145 = 0.015 m/s	allow both substitution and calculation marks for a correct value without working  allow 6.1, or ecf for distance 7 for time  allow alternatives with compatible unit, e.g. 1.45 cm/s OR 1.5 cm/s 14.5 mm/s OR 15 mm/s 0.87 m/minutes 87 cm/minute 870 mm/minute Allow for 1 mark 6 / 7 or 0.9	3

**Total 7 marks**

Question number	Answer	Notes	Marks
7 (a) (i)	<p>Any two of -</p> <p>MP1. arrow downwards, labelled weight;</p> <p>MP2. arrow upwards, labelled reaction/contact force;</p> <p>MP3. arrow to the left, labelled air friction / air resistance / drag;</p> <p>MP4. arrow along the surface, labelled friction;</p> <p>e.g.</p> 	<p>In MP1, 2 &amp; 3, position of arrows unimportant, but direction must match label Allow initial letters as shown in example ignore</p> <ul style="list-style-type: none"> <li>• gravity</li> <li>allow</li> <li>• mg</li> <li>• force of gravity</li> </ul> <ul style="list-style-type: none"> <li>• arrow drawn on left or right</li> </ul> <p>Accept arrow in either direction for MP4</p> <p>N = normal contact force</p>	2
(ii)	<p>Any three of -</p> <p>MP1. friction/resistance /drag (acts);</p> <p>MP2. (there is an) unbalanced force;</p> <p>MP3. (hence) ball decelerates;</p> <p>MP4. reference to <math>f_{(R)} = ma</math>;</p> <p>MP5. (kinetic) energy dissipates / fate of energy discussed;</p>	<p>ignore stem allow</p> <ul style="list-style-type: none"> <li>• resistive forces &gt; {forward/driving} force</li> <li>• there is a resultant force</li> <li>• its momentum changes</li> <li>• accelerates</li> </ul>	3

(b) (i)	idea that friction is (much) less in the air;	allow <ul style="list-style-type: none"><li>• RA</li><li>• no contact / ground friction</li><li>• less energy lost</li></ul>	1
---------	---	--	---

Question number	Answer	Notes	Marks
7 (c) (i)	KE = $\frac{1}{2} mv^2$ ;	Words or symbols	1
(ii)	<p>Conversion to kg;                      Substitution into correct equation;                      Rearrangement;                      Evaluation;</p> <p>e.g. 45 g = 0.045 kg (or 1 kg = 1000 g etc)  <math>36 = \frac{1}{2} \times 0.045 \times v^2</math>  <math>v^2 = \frac{2 \times 36}{0.045}</math> (= 1600)                      40 (m/s)</p>	<p>allow</p> <ul style="list-style-type: none"> <li>• 1000 seen</li> <li>• steps in any order</li> <li>• correct answer with no working for full marks</li> <li>• up to 3 marks for use of 45 kg <math>\rightarrow</math> 1.26 (m/s)- working must be seen</li> </ul>	4
(iii)	<p>Any one of-</p> <ul style="list-style-type: none"> <li>• (Hit the ball transferring) more energy;</li> <li>• (Hit the ball with) more velocity;</li> <li>• (Hit the ball with) more speed;</li> <li>• (Hit the ball with) more force;</li> </ul>	<p>Ignore</p> <ul style="list-style-type: none"> <li>• harder</li> <li>• power</li> </ul> <p>Allow</p> <ul style="list-style-type: none"> <li>• momentum</li> <li>• keep contact for a larger part of the swing</li> <li>• go to a place where g is less (e.g. on the moon)</li> <li>• hit ball at a steeper angle / vertically (e.g. use a more lofted club)</li> </ul>	1
