MARK SCHEME for the May/June 2009 question paper

for the guidance of teachers

9706 ACCOUNTING

9706/04

Paper 4 (Problem Solving (Supplementary Topics)), maximum raw mark 120

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes must be read in conjunction with the question papers and the report on the examination.

• CIE will not enter into discussions or correspondence in connection with these mark schemes.

CIE is publishing the mark schemes for the May/June 2009 question papers for most IGCSE, GCE Advanced Level and Advanced Subsidiary Level syllabuses and some Ordinary Level syllabuses.

			^		¢		

	\$	\$	
Sales		240 000 (1)	
Raw materials	107 520 (4)	24 000 (1) × 1.4 (1) × \$3.20 (1)	
Labour	<u>33 600</u> (4)	24 000 (1) × 1/6 th (1) × \$8.40 (1)	
		141 120	
Contribution		<u>98 880</u> (1)	[10]

- (c) All based on 'own figures' from part (a).
 - (i) Lower sales volume than predicted (1) Less good quality of finished product? (1) Development - poorer materials (material usage variance) (2) Less skilled workforce (labour rate variance) (2) Competition (1) – customers buying from other businesses (1) Selling price still too high? (1) – competitors cheaper? (1)
 - (ii) Decrease in supply of materials (0–2) Increase in taxes levied on materials (import duties etc) (0–2) Lowering of subsidies. (0–2)
 - (iii) Unemployment in particular skills (1) more workers seeking work (1) Increase in supply of labour for other reasons (0–2)

Other reasonable reasons to be rewarded 1 mark for identification further marks for development. [max 6]

(d) If a favourable material usage variance is evident then fewer materials have been used than was planned then this generally means that more highly skilled workers have been employed or that training has been undertaken in this particular part of the business; the workers have taken less time to produce the goods.
[0–6]

If an adverse material usage variance is evident then more materials have been used than was planned then this generally means that less skilled workers have been and they have therefore taken longer to complete their work than had been anticipated. [0–6]

[max 6]
