

**MARK SCHEME for the October/November 2010 question paper  
for the guidance of teachers**

**9706 ACCOUNTING**

**9706/43**

Paper 4 (Problem Solving (Supplement)),  
maximum raw mark 120

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes must be read in conjunction with the question papers and the report on the examination.

- CIE will not enter into discussions or correspondence in connection with these mark schemes.

CIE is publishing the mark schemes for the October/November 2010 question papers for most IGCSE, GCE Advanced Level and Advanced Subsidiary Level syllabuses and some Ordinary Level syllabuses.

**(c) (i)**  $\frac{130\,500}{10\,000} \times 100 = 1305\%$  **(1of)** or 2175% (if only interest used) **[3]**

**(ii)**  $\frac{150\,500}{526\,233} \times 100 = 28.50\%$  **(1of)** **[3]**

**(d)** Interest is easily covered by current profit **(1of)** so low risk **(1of)**  
Gearing ratio is below 50% so is low **(1of)** low risk **(1of)** **[max 3]**

**(e)** Current ratio shows that there are enough current assets to cover the current liabilities 2.5 times **(1)** the acid test ratio is also strong at 1.51 :1 **(1of)** the bank balance is sufficient to cover around 4 months expenses **(1)** perhaps some of the current assets could be more usefully used **(1)** to fund more productive non current assets **(1)**

Debtors days seem rather long **(1)** faster turnover would give the company still more cash **(1)**  
Creditors days are shorter than debtors days **(1)** will 40 days antagonise suppliers ? **(1)**

Other valid comments re liquidity to be rewarded **[max 6]**
