| Question <br> Number | Answer | Mark |
| :--- | :--- | :--- |
| $\mathbf{1 ( a ) ( \mathbf { i } )}$ | The only correct answer is c - $\mathbf{6 6 0}$ minutes |  |
|  | $\boldsymbol{A}$ is incorrect because G1 lasts just under half of 23 hours which is $11 \times 60=660$ minutes <br> $\boldsymbol{B}$ is incorrect because G1 lasts just under half of 23 hours which is $11 \times 60=660$ minutes <br> $\boldsymbol{D}$ is incorrect because G1 lasts just under half of 23 hours which is $11 \times 60=660$ minutes |  |

| Question <br> Number | Answer | Additional guidance | Mark |
| :--- | :--- | :--- | :--- |
| $\mathbf{1 ( a ) ( i i )}$ | 1. one of two (DNA) molecules that make up a <br> chromosome / eq ; | ACCEPT equivalent wording for mark <br> points 1 and 2 | 1.ACCEPT each chromatid contains <br> one DNA molecule <br> 1. IGNORE strand |
|  | 2. Idea that DNA replicates (in S phase)/eq; |  | (2) |

| Question <br> Number | Answer | Mark |
| :--- | :--- | :--- | :--- |
| $\mathbf{1 ( a ) ( i i i )}$ | The only correct answer is c - |  | |  |
| :--- |
|  |
|  |
| $\boldsymbol{A}$ is incorrect because the cell is in metaphase <br> $\boldsymbol{B}$ is incorrect because the cell is in anaphase <br> $\boldsymbol{D}$ is incorrect because the cell is in interphase |

| Question <br> Number | Answer | Mark |
| :--- | :--- | :--- |
| $\mathbf{1 ( \mathbf { b } ) ( \mathbf { i } )}$ | The only correct answer is $\mathbf{A} \mathbf{- 1 , 5 , 6 , 4 , 3 , 2}$ |  |
| B is incorrect because the coverslip has to be put on before the cells are squashed <br> $\boldsymbol{C}$ is incorrect because the cells cannot be teased apart before adding acid <br> $\boldsymbol{D}$ is incorrect because the cells cannot be teased apart before adding acid |  |  |

$\left.\begin{array}{|l|l|l|l|}\hline \begin{array}{l}\text { Question } \\ \text { Number }\end{array} & \text { Answer } & \text { Additional guidance } & \text { Mark } \\ \hline \mathbf{1 ( b ) ( i i ) ~} & \begin{array}{l}\text { (acetic/ethanoic/propionic) orcein / Feulgen's (stain)/ toluidine } \\ \text { (blue) / (aceto)carmine / methylene blue / Schiff's (reagent); }\end{array} & \text { DO NOT ACCEPT iodine }\end{array}\right]$

| Question Number | Answer | Additional guidance | Mark |
| :---: | :---: | :---: | :---: |
| 2(a) | Animal cells only: <br> centriole ; <br> Animal and plant cells: <br> (cell) membrane / cytoplasm / Golgi (apparatus) / mitochondrion / endoplasmic reticulum / lysosome /nucleus / nucleolus / ribosome ; <br> Plant cells only: <br> chloroplast / cell wall / amyloplast / tonoplast / plasmodesma / \{large / permanent / sap/ eq\} vacuole ; | ACCEPT plural names ACCEPT phonetic spellings DO NOT ACCEPT when more than one answer is given in one part of the diagram if one of these answers is incorrect for the cell type <br> ACCEPT centrosome/cortical granules <br> ACCEPT correctly qualified answers <br> e.g plasma membrane / rough ER /smooth ER / 80S ribosome IGNORE vacuole <br> ACCEPT pits / middle lamella | (3) |

| Question Number | Answer | Additional guidance | Mark |
| :---: | :---: | :---: | :---: |
| 2(b) | 1. peptidoglycan cell wall ; <br> 2. loop of DNA / nucleoid; <br> 3. plasmids; <br> 4. pili ; <br> 5. (slime) capsule ; <br> 6. 70 S ribosomes | DO NOT ACCEPT flagellum, glycogen granules, cytoplasm, membrane, ribosomes, 80 S ribosomes 1.ACCEPT murein cell wall <br> 2.ACCEPT circular DNA <br> 4. ACCEPT fimbriae <br> 5. ACCEPT slime layer <br> 6. IGNORE small ribosomes <br> 7. ACCEPT mesosome | (3) |

| Question Number | Answer | Additional guidance | Mark |
| :---: | :---: | :---: | :---: |
| 2(c) | 1. idea that classification was based on \{anatomy / morphology /physical structure / eq\}; <br> 2. idea of use or availability of \{improved / electron\} microscopes ; <br> 3. use of molecular phylogeny; <br> 4. idea that \{more / new\} species \{have been / will be\} discovered; <br> 5. idea that in the future, technology will continue to develop ; | IGNORE references to natural selection <br> 2. and 3. named equipment or methods must be given <br> 3.ACCEPT a name or description of chemical analysis <br> e.g. proteomics / DNA profiling / DNA analysis <br> 4. DO NOT ACCEPT new organisms <br> 4. IGNORE references to speciation, this has to be in context of discovery or identification of species <br> 5. e.g. improved technology / chemical analysis / DNA analysis (in the future) |  |

| Question <br> Number | Answer | Mark |
| :--- | :--- | :--- | :--- |
| $\mathbf{3 ( a ) ( \mathbf { i } )}$ | The only correct answer is C - 46 23 |  |
|  | $\boldsymbol{A}$ is incorrect because mitosis does not halve the number of chromosomes <br> $\boldsymbol{B}$ is incorrect because mitosis does not halve the number of chromosomes but meiosis does <br> $\boldsymbol{D}$ is incorrect because meiosis halves the number of chromosomes |  |

| Question <br> Number | Answer | Additional guidance | Mark |
| :--- | :---: | :--- | :--- |
| 3(a)(ii) | 1. to increase the number of primary spermatocytes; | 1. the cells must be named <br> 2. ACCEPT many more <br> sperm are produced <br> 2. idea that large numbers of sperm cells are produced; <br> number of sperm | (2) |

| Question <br> Number | Answer | Mark |
| :--- | :--- | :--- |
| $\mathbf{3 ( b ) ( \mathbf { i } )}$ | The only correct answer is A - P |  |
| $\boldsymbol{B}$ is incorrect because the acrosome is in the front of the head <br> $\boldsymbol{C}$ is incorrect because the acrosome is in the front of the head <br> $\boldsymbol{D}$ is incorrect because the acrosome is in the head | (1) |  |

| Question <br> Number | Answer | Mark |
| :--- | :--- | :--- |
| $\mathbf{3 ( b ) ( \mathbf { i i ) }}$ | The only correct answer is C - S |  |
|  | $\boldsymbol{A}$ is incorrect because the mitochondrion is located in the neck <br> $\boldsymbol{B}$ is incorrect because the mitochondrion is located in the neck <br> $\boldsymbol{D}$ is incorrect because the mitochondrion is located in the neck | (1) |

| Question <br> Number | Answer | Additional guidance | Mark |
| :--- | :--- | :--- | :--- |
| 3(b)(iii) | 1. $(\mathrm{L}=) 0.6 \times 5 / 3(\mu \mathrm{~m}) ;$ | Correct answer alone <br> gains three marks |  |
|  | 2. $(\mathrm{M}=) 10 \times 5 / 50(\mu \mathrm{~m}) ;$ |  | (3) |
|  | 3. (total length $=) 58(\mu \mathrm{~m}) ;$ |  |  |

| Question <br> Number | Answer | Additional guidance | Mark |
| :--- | :--- | :--- | :--- |
| 4(a) | any two dominant alleles | e.g.p p Q q R r |  |
|  | only one dominant allele | e.g.p p q q Rr |  |
|  | pp q q rr; |  | (1) |

| Question <br> Number | Answer | Additional guidance | Mark |
| :--- | :---: | :--- | :--- |
| 4(b)(i) | 1. idea that one \{characteristic / phenotype / eq\} determined by <br> more than one gene ; | 1. ACCEPT trait, feature, <br> physical appearance, <br> external appearance as eq to <br> characteristic <br> $1 . D O$ NOT award mp1 if <br> answer is in context of genes <br> at the same loci <br> $1 . D O$ NOT award in the <br> context of alleles <br> 2. ACCEPT PP QQ RR unless <br> answer is in context of alleles | (2) |

| Question <br> Number | Answer | Additional guidance | Mark |
| :--- | :--- | :--- | :--- |
| 4(b)(ii) | 1. \{observable / expressed / eq\} \{characteristic / feature / eq\} ; <br> 2. skin colour ; |  | (2) |

| Question <br> Number | Answer | Additional guidance | Mark |
| :--- | :--- | :--- | :--- |
| 4(b)(iii) | 1. idea that there is a range of \{phenotypes / characteristics / <br> traits /eq\} ; | 1. ACCEPT normal <br> distribution | 2. More than two should be <br> stated or listed |

| Question <br> Number | Answer | Additional guidance | Mark |
| :--- | :--- | :--- | :--- |
| 4(c)(i) | as one variable / factor increases the other decreases | ACCEPT converse <br> ACCEPT lighter the skin the <br> greater the risk of developing <br> skin cancer <br> ACCEPT skin colour <br> increases / numerical value <br> increases as eq to darker <br> ACCEPT inverse relationship <br> DO NOT ACCEPT answers <br> that state a causal <br> relationship |  |

| Question <br> Number | Answer | Additional guidance | Mark |
| :--- | :--- | :--- | :--- |
| 4(c)(ii) | 1. idea that skin colour is genetic and (exposure to) ultraviolet <br> light is environmental ; | 1.Piece together if necessary <br> 1.ACCEPT melanin production <br> is genetic <br> 1.ACCEPT genotype as eq to <br> genetic <br> 2.IGNORE radiation |  |
|  | 2. ultraviolet (light / radiation) is known to \{cause mutations / <br> be a mutagen\} ; | 3 e.g. DNA repair mechanisms <br> decrease, formation of <br> oncogene, tumour suppressor <br> gene affected |  |
| 4. idea that control of cell cycle is lost ; | 4e.g. cell growth cannot be <br> controlled, cell division cannot <br> be controlled, no Hayflick limit | (3) |  |

| Question Number | Answer |  | Additional guidance | Mark |
| :---: | :---: | :---: | :---: | :---: |
| 5(a) |  |  |  |  |
|  |  | Xylem |  |  |
|  |  | cellulose and lignin ; (ignore pectin) |  |  |
|  |  | absent / eq ; |  |  |
|  |  | absent / eq ; |  |  |
|  |  | Any two from: <br> transport of water <br> transport of mineral (ions) <br> support / eq ; | CARE two correct functions must be stated to gain the one available mark | (4) |

| Question Number | Answer | Additional guidance | Mark |
| :---: | :---: | :---: | :---: |
| 5(b) | 1. (starch) contains \{large numbers of glucose molecules / polymer of glucose molecules\} ; <br> 2. branched so that it can be \{hydrolysed / release energy\} easily / eq ; <br> 3. compact so that \{more/ a lot of \} glucose can fit into a particular space / eq ; <br> 4. insoluble so no osmotic effect / eq ; | 1. ACCEPT starch can store a large amount of energy <br> 2. ACCEPT broken down <br> 2. ACCEPT readily hydrolysed <br> 2. ACCEPT if amylopectin stated rather than starch <br> 3.ACCEPT if amylose / amylopectin is stated rather than starch <br> 4. ACCEPT insoluble so is not lost from the cell / storage organ | (3) |
| Question Number | Answer | Additional guidance | Mark |
| 5(c) | 1. supplies water \{for photosynthesis / to keep cells turgid\} / eq ; <br> 2. supplies magnesium (ions) for synthesis of chlorophyll / eq ; <br> 3. supplies nitrate for synthesis of \{amino acids / protein / DNA / eq\} ; <br> 4. supplies calcium (ions) for cell wall structure / eq ; <br> 5. supplies phosphate for synthesis of \{ATP /DNA /eq\}; <br> 6. supports the leaves so they are exposed to sunlight ; | 1. to 5. ACCEPT answers in context of (parenchyma) cells need these materials <br> 3. DO NOT ACCEPT nitrogen <br> 5.DO NOT ACCEPT phosphorus <br> 6.IGNORE supports the plant | (3) |

| Question <br> Number | Answer | Additional guidance | Mark |
| :--- | :--- | :--- | :--- |
| 6(a) | 1. the \{number / variety / range\} of species ; | 1. DO NOT ACCEPT <br> organisms <br> 1. ACCEPT amount <br> 1. ACCEPT species richness <br> 2. in a habitat / eq ; <br> OR | 2. ACCEPT area / region / <br> ecosystem |
|  | 2. in a \{gene pool / population / species ; ; |  |  |

| Question Number | Answer | Additional guidance | Mark |
| :---: | :---: | :---: | :---: |
| 6(b)(ii) | 1. testing which bacteria were affected ; <br> 2. determining the concentration to use ; <br> 3. animal testing ; <br> 4. testing on (small group of) healthy people ; <br> 5. testing on a small group of patients / eq ; <br> 6. idea of testing on a large group of patients / eq ; | 2. ACCEPT dosage <br> 3. ACCEPT cell toxicity or tissue culture <br> 5. ACCEPT 100-300 if no written description <br> 6. ACCEPT $\geq 1000$ if no written description | (4) |

| Question Number | Answer | Additional guidance | Mark |
| :---: | :---: | :---: | :---: |
| 6(c) | 1. store seeds ; <br> 2. in a seed bank ; <br> OR <br> 3. take cuttings ; <br> 4. and grow them in \{greenhouses / eq\} ; <br> OR <br> 5. make certain areas of the rainforest into protected areas ; <br> 6. so that they cannot be used for \{deforestation / housing / eq\} ; | If two methods are described credit the one that yields the higher mark <br> 2. ACCEPT at low temperature and low humidity <br> 3. ACCEPT take explants <br> 4. ACCEPT growing in tissue culture | (2) |

| Question <br> Number | Answer | Additional guidance | Mark |
| :--- | :--- | :--- | :--- |
| 7(a) | 1. both \{divide indefinitely / are unspecialised / eq\} ; | Piece together answers if <br> necessary |  |
|  | 2. idea that totipotent stem cells can become all cell types but <br> pluripotent stem cells can become \{many / most\} cell <br> types; | 1.ACCEPT undifferentiated <br> 1.ACCEPT no Hayflick limit |  |
| 2. ACCEPT totipotent can |  |  |  |
| give rise to all cells, |  |  |  |
| pluripotent cannot give rise |  |  |  |
| to placental / extraembryonic |  |  |  |
| cells |  |  |  |$\quad$ (2)

| Question Number | Answer | Additional guidance | Mark |
| :---: | :---: | :---: | :---: |
| *7(b) | 1. mitosis to increase number of cells / eq ; <br> 2. idea of responding to \{chemical / environmental\} stimulus ; <br> 3. reference to differential gene expression ; <br> 4. credit example from question of genes switched on ; <br> 5. credit example from question of genes switched off ; <br> 6. idea of \{transcription / mRNA produced\} at active genes ; <br> 7. \{proteins / polypeptides / eq\} produced (from this mRNA) ; <br> 8. idea that this protein (permanently) modifies cell <br> OR <br> idea that this protein determines \{cell structure / function \} ; | QWC focus on clarity of expression <br> 2.ACCEPT hormone / external stimulus <br> 4. e.g. gene for production of insulin switched on in pancreatic cells <br> 5. e.g. gene for production of insulin switched off in nerve cells / muscle cells / heart muscle cells <br> 7. ACCEPT mRNA is translated |  |

| Question Number | Answer | Additional guidance | Mark |
| :---: | :---: | :---: | :---: |
| 7(c) | 1. idea they \{monitor research / ensure research is necessary\} ; <br> 2. idea that they issue licences (for stem cell research) ; <br> 3. idea they monitor sources of stem cells ; <br> 4. ensure that only early stage embryos are used (as sources of stem cells) ; <br> 5. prevent unethical use of stem cells ; | 1. ACCEPT to ensure experiments are not unnecessarily repeated <br> 2.ACCEPT idea of giving permission for the research 2.ACCEPT idea that guidelines are adhered to <br> 4. in the UK this is up to 14 days <br> 4. ACCEPT to determine the maximum age of embryos that can be used <br> 5. e.g. human cloning, genetic manipulation 5.IGNORE designer babies, playing God, right to life | (3) |

| Question <br> Number | Answer | Mark |
| :--- | :--- | :--- |
| $\mathbf{8 ( a ) ( \mathbf { i } )}$ | The only correct answer is B - behavioural anatomical |  |
|  | $\boldsymbol{A}$ is incorrect because wading is behavioural <br> $\boldsymbol{C}$ is incorrect because possessing feathers in anatomical <br> $\boldsymbol{D}$ is incorrect because wading is behavioural | (1) |

| Question <br> Number | Answer | Additional guidance | Mark |
| :--- | :--- | :--- | :--- |
| 8(a)(ii) | 1. (the birds) occupy different niches ; <br> 2. they have different length of beak / eq; <br> 3. idea they have different sources of food / eq; | Piece together answer if <br> necessary |  |
|  | 4. to avoid competition with each other / eq; | 3.ACCEPT idea of their food is at <br> different depths <br> 3.ACCEPT they have different food | (3) |

| Question <br> Number | Answer | Additional guidance | Mark |
| :--- | :--- | :--- | :--- |
| $\mathbf{8 ( b ) ( \mathbf { i } )}$ | 1. idea of water supplying the food ; <br> 2. idea of water containing oxygen ; <br> 3. \{gills / large surface area\} for the uptake of oxygen ; <br> 4. idea of being protected from predators ; | 1.ACCEPT nutrients |  |

| Question Number | Answer | Additional guidance | Mark |
| :---: | :---: | :---: | :---: |
| 8(b)(ii) | 1. The range is the same in winter and summer ; <br> 2. tunnels are deeper in the winter / eq ; <br> 3. more tunnels in winter ; <br> 4. greater variation in the number in winter / eq ; | ACCEPT converse for summer throughout <br> 1. ACCEPT the range is 30 mm in both <br> 3.IGNORE comments about one specific depth | (2) |

| Question Number | Answer | Additional guidance | Mark |
| :---: | :---: | :---: | :---: |
| 8(b)(iii) | 1. there is not enough food; <br> 2. (so) there is competition for \{food / lugworms\} ; <br> 3. credit explanation of how competition is avoided ; | 1.ACCEPT not enough lugworms <br> 2. ACCEPT between godwits or with other species <br> 3. e.g. move to where the lugworms are not buried so deeply, move to where there are lugworms <br> e.g. change to another food source, feed on species still available, feed on species nearer the surface <br> IGNORE change their diet |  |
