Pearson Edexcel International Advanced Level	Centre	e Number	Candidate Number	
Wednesday 2	2 1	lay	2019	
Morning (Time: 1 hour 30 minute	es)	Paper R	Reference WMA11/01	
Mathematics International Advance Pure Mathematics P1	d Sub	osidiar	y/Advanced Level	
You must have: Mathematical Formulae and Stat	istical T	ābles (Lil	lac), calculator	

Candidates may use any calculator permitted by Pearson regulations. Calculators must not have the facility for symbolic algebra manipulation, differentiation and integration, or have retrievable mathematical formulae stored in them.

Instructions

- Use **black** ink or ball-point pen.
- If pencil is used for diagrams/sketches/graphs it must be dark (HB or B).
- Fill in the boxes at the top of this page with your name, centre number and candidate number.
- Answer **all** questions and ensure that your answers to parts of questions are clearly labelled.
- Answer the questions in the spaces provided there may be more space than you need.
- You should show sufficient working to make your methods clear. Answers without working may not gain full credit.
- Inexact answers should be given to three significant figures unless otherwise stated.

Information

- A booklet 'Mathematical Formulae and Statistical Tables' is provided.
- There are 10 questions in this question paper. The total mark for this paper is 75.
- The marks for each question are shown in brackets

 use this as a guide as to how much time to spend on each question.

Advice

- Read each question carefully before you start to answer it.
- Try to answer every question.
- Check your answers if you have time at the end.
- If you change your mind about an answer, cross it out and put your new answer and any working underneath.

P61837A ©2019 Pearson Education Ltd. 1/1/1/1/1/1/

Answer all questions. Write your answers in the spaces provided.

- 1. The curve C has equation $y = \frac{1}{8}x^3 \frac{24}{\sqrt{x}} + 1$
 - (a) Find $\frac{dy}{dx}$, giving the answer in its simplest form.

The point P(4, -3) lies on C.

(b) Find the equation of the tangent to C at the point P. Write your answer in the form y = mx + c, where m and c are constants to be found.

Answer this question showing each stage of your working. 2.

(a) Simplify $\frac{1}{4-2\sqrt{2}}$

giving your answer in the form $a + b\sqrt{2}$ where a and b are rational numbers.

(b) Hence, or otherwise, solve the equation

 $4x = 2\sqrt{2}x + 20\sqrt{2}$

giving your answer in the form $p + q\sqrt{2}$ where p and q are rational numbers.

	(Total 5 marks)	

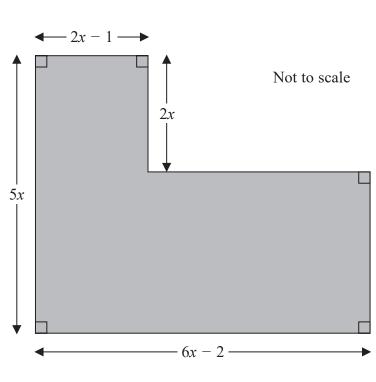

Figure 1 shows the plan of a garden. The marked angles are right angles.

The six edges are straight lines.

The lengths shown in the diagram are given in metres.

Given that the perimeter of the garden is greater than 29 m,

(a) show that
$$x > 1.5 \,\mathrm{m}$$

Given also that the area of the garden is less than 72 m^2 ,

- (b) form and solve a quadratic inequality in *x*.
- (c) Hence state the range of possible values of *x*.

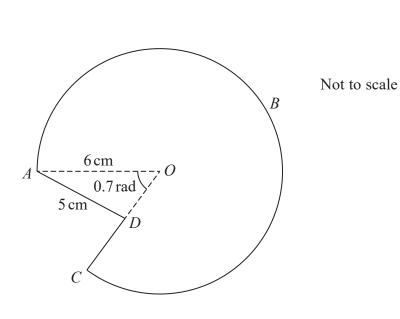

Figure 2

The shape *ABCDA* consists of a sector *ABCOA* of a circle, centre *O*, joined to a triangle *AOD*, as shown in Figure 2.

The point *D* lies on *OC*.

7.

The radius of the circle is 6 cm, length AD is 5 cm and angle AOD is 0.7 radians.

(a) Find the area of the sector *ABCOA*, giving your answer to one decimal place.

Given angle ADO is obtuse,

- (b) find the size of angle *ADO*, giving your answer to 3 decimal places.
- (3)

(3)

(c) Hence find the perimeter of shape *ABCDA*, giving your answer to one decimal place. (4)

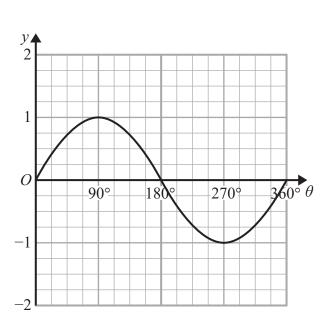

Figure 3 shows a plot of the curve with equation $y = \sin \theta$, $0 \le \theta \le 360^{\circ}$

(a) State the coordinates of the minimum point on the curve with equation

$$y = 4\sin\theta, \quad 0 \leqslant \theta \leqslant 360^{\circ}$$

A copy of Figure 3, called Diagram 1, is shown on the next page.

(b) On Diagram 1, sketch and label the curves

- (i) $y = 1 + \sin \theta$, $0 \le \theta \le 360^{\circ}$
- (ii) $y = \tan \theta$, $0 \le \theta \le 360^{\circ}$

(c) Hence find the number of solutions of the equation

- (i) $\tan \theta = 1 + \sin \theta$ that lie in the region $0 \le \theta \le 2160^{\circ}$
- (ii) $\tan \theta = 1 + \sin \theta$ that lie in the region $0 \le \theta \le 1980^{\circ}$

10. A curve has equation y = f(x), where

 $f(x) = (x - 4)(2x + 1)^2$

The curve touches the x-axis at the point P and crosses the x-axis at the point Q.

- (a) State the coordinates of the point *P*.
- (b) Find f'(x).
- (c) Hence show that the equation of the tangent to the curve at the point where $x = \frac{5}{2}$ can be expressed in the form y = k, where k is a constant to be found.

The curve with equation y = f(x + a), where a is a constant, passes through the origin O.

(d) State the possible values of *a*.
