Mark Scheme (Results)

Summer 2013

GCE Statistics 1 (6683/01)

Edexcel and BTEC Qualifications

Edexcel and BTEC qualifications come from Pearson, the world's leading learning company. We provide a wide range of qualifications including academic, vocational, occupational and specific programmes for employers. For further information, please visit our website at <u>www.edexcel.com</u>.

Our website subject pages hold useful resources, support material and live feeds from our subject advisors giving you access to a portal of information. If you have any subject specific questions about this specification that require the help of a subject specialist, you may find our Ask The Expert email service helpful.

Pearson: helping people progress, everywhere

Our aim is to help everyone progress in their lives through education. We believe in every kind of learning, for all kinds of people, wherever they are in the world. We've been involved in education for over 150 years, and by working across 70 countries, in 100 languages, we have built an international reputation for our commitment to high standards and raising achievement through innovation in education. Find out more about how we can help you and your students at: www.pearson.com/uk

Summer 2013 Publications Code UA036993 All the material in this publication is copyright © Pearson Education Ltd 2013

General Marking Guidance

- All candidates must receive the same treatment. Examiners must mark the first candidate in exactly the same way as they mark the last.
- Mark schemes should be applied positively. Candidates must be rewarded for what they have shown they can do rather than penalised for omissions.
- Examiners should mark according to the mark scheme not according to their perception of where the grade boundaries may lie.
- There is no ceiling on achievement. All marks on the mark scheme should be used appropriately.
- All the marks on the mark scheme are designed to be awarded. Examiners should always award full marks if deserved, i.e. if the answer matches the mark scheme. Examiners should also be prepared to award zero marks if the candidate's response is not worthy of credit according to the mark scheme.
- Where some judgement is required, mark schemes will provide the principles by which marks will be awarded and exemplification may be limited.
- Crossed out work should be marked UNLESS the candidate has replaced it with an alternative response.

EDEXCEL GCE MATHEMATICS

General Instructions for Marking

- 1. The total number of marks for the paper is 75.
- 2. The Edexcel Mathematics mark schemes use the following types of marks:
- **M** marks: method marks are awarded for 'knowing a method and attempting to apply it', unless otherwise indicated.
- A marks: accuracy marks can only be awarded if the relevant method (M) marks have been earned.
- **B** marks are unconditional accuracy marks (independent of M marks)
- Marks should not be subdivided.
- 3. Abbreviations

These are some of the traditional marking abbreviations that will appear in the mark schemes:

- bod benefit of doubt
- ft follow through
- the symbol $\sqrt{}$ will be used for correct ft
- cao correct answer only
- cso correct solution only. There must be no errors in this part of the question to obtain this mark
- isw ignore subsequent working
- awrt answers which round to
- SC: special case
- oe or equivalent (and appropriate)
- dep dependent
- indep independent
- dp decimal places
- sf significant figures
- * The answer is printed on the paper
- The second mark is dependent on gaining the first mark
- 4. All A marks are 'correct answer only' (cao.), unless shown, for example, as A1 ft to indicate that previous wrong working is to be followed through. After a misread however, the subsequent A marks affected are treated as A ft, but manifestly absurd answers should never be awarded A marks.
- 5. For misreading which does not alter the character of a question or materially simplify it, deduct two from any A or B marks gained, in that part of the question affected.
- 6. If a candidate makes more than one attempt at any question:
 - If all but one attempt is crossed out, mark the attempt which is NOT crossed out.
 - If either all attempts are crossed out or none are crossed out, mark all the attempts and score the highest single attempt.
- 7. Ignore wrong working or incorrect statements following a correct answer.
- 8. In some instances, the mark distributions (e.g. M1, B1 and A1) printed on the candidate's response may differ from the final mark scheme.

(b) $r = \frac{-22408.9}{\sqrt{1491222 \times 371.56}} = -0.95200068$ $awrt - 0.952$ M1A1 (c) Yes as <i>r</i> is close to -1 (if -1 < <i>r</i> < -0.5) <u>or</u> Yes as <i>r</i> is close to 1 (if 1 > <i>r</i> > 0.5) [If -0.5 \leq <i>r</i> \leq 0.5 allow "no since <i>r</i> is close to 0"] [If <i>r</i> > 1 award B0] (d) $b = \frac{-22408.9}{1491222.2} = -0.015027$ (allow $\frac{-56}{3725}$) $awrt - 0.015$ M1 A1 $a = \frac{110}{9}$ - "their <i>b</i> "× $\frac{7150}{9} = (12.20.015 \times 794.4) = 24.1604$ so <i>t</i> = 24.2 - 0.015 <i>h</i> (f) Change = ("24.2 - 0.015" × 500) - ("24.2 - 0.015" × 1000) <u>or</u> 500 × "0.015" $= \pm 7.5$ (awrt ± 7.5) (only ft a value < 100) (13 M1 for at least one correct expression (condone transcription error) 1 st A1 for $S_{hh} = awrt 1 490 000$ or $S_{h} = awt -22 400$ (Condone S_{x} or $S_{xy} =$ or even $S_{yy} =$) 2 nd A1 for $S_{hh} = awrt 1 490 000$ or S_{h} as S_{hh} et closes the final A1) (b) M1 for attempt at correct formula. Notes			
Probabilities outside [0, 1] should be awarded M0			
2^{nd} M1 for an attempt at a second linear equation in a and b based on $E(X) = 4.2$ Allow one			
3^{rd} M1 for an attempt to solve their 2 linear equations based on sum of probs and E(X). Must			
a linear equation in one variable. 1^{st} B1 for b and 2^{nd} B1 for a. Answers only score B1B1			
The 3 rd M1 may be implied if M2 is scored and both correct answers are given	n.		
ALT B1B1 for stating b and a.			
1^{st} M1 for showing that sum of probs. = 1			
2^{nd} M1 for showing that E(X) = 4.2			
3^{rd} M1 for an overall comment "(therefore) $a = \dots$ and $b = \dots$ " No comment loses this	s mark.		
(b) B1cso for a fully correct expression (no incorrect work seen). E.g. allow $14 \times 0.1 + 41 \times 0.2$	$+41 \times 0.2 + 36 \times 0.3$		
Or $0.1+0.4+0.9+3.2+5+10.8$. Allow in a table (with 20.4) but without "+" expl	licitly seen.		
(c) 1^{st}M1 for a correct expression for Var(X). Must see -4.2^2			
2^{nd} M1 for $(-3)^2$ Var(X) or better, no need for a value. Accept -3^2 if it clearly is used a	as +9 later.		
(e) B1 for $P(Y=1) = 0.1$			
M1 for correct use of $F(y)$ to find one other prob. Can ft their k if finding $P(Y = y)$ for	for $v > 2$		
Can be implied by one other prob. correct or correct ft Look out for $P(3) = 3k - 0.2$ or $P(4)$	•		
A1 for a fully correct probability distribution. Correct table only is 3/3	, (-,		
(f) M1 for a correct expression or answer ft their $P(Y = 1)$ and their $P(X = 1)$			
A1 for 0.01 or exact equivalent only			
Don't ISW here e.g. $0.1 \times 0.1 + 0.1 \times 0.1$ or $2 \times 0.1 \times 0.1$ are M0A0			

Ques	stion	Scheme	
6.	(a)	[Let X be the amount of beans in a tin. $P(X < 200) = 0.1$]	
		$\frac{200 - \mu}{7.8} = -1.2816$ [calc gives 1.28155156]	M1 B1
		$\mu = 209.996$ awrt 210	A1
	(b)	$P(X > 225) = P\left(Z > \frac{225 - "210"}{7.8}\right)$	(3) M1
		$= P(Z > 1.92) \underline{\text{or}} 1 - P(Z < 1.92) (\text{allow } 1.93)$ = 1 - 0.9726 = 0.0274 (or better) [calc gives 0.0272037] = 0.0274	A1
		= 0.0274 = awrt <u>2.7%</u> allow <u>0.027</u>	A1 (3)
	(c)	[Let Y be the new amount of beans in a tin] $\frac{210-205}{\sigma} = 2.3263 \text{or} \frac{200-205}{\sigma} = -2.3263 \text{[calc gives } 2.3263478]}$	M1 B1
		$\sigma = \frac{5}{2.3263}$	dM1
		$\sigma = 2.15$ (2.14933)	A1 (4) (10 marks)
	Notes		
NotesCondone poor handling of notation if answers are correct but A marks must have corre(a)M1for an attempt to standardise (allow \pm) with 200 and 7.8 and set = \pm any z valuB1for $z = \pm 1.2816$ (or better used as a z)[May be implied by 209.996(102) orA1for awrt 210 (can be scored for using 1.28 but then they get M1B0A1)The 210 must follow from correct working – sign scores A0If answer is awrt 210 and 209.996 or better seen then award M1B1A1 $z = 1.28$ gives 209.984 and $z = 1.282$ gives 209.9996 and both score M1B0A1If answer is awrt 210 or awrt 209.996 then award M1B0A1 (unless of course $z = 1.2$ (b)M1M1for attempting to standardise with 225, their mean and 7.8. Allow \pm 1^{st} A1for $Z >$ awrt 1.92/3. Allow a diagram but must have 1.92/3 and correct area in Must have the Z so P($X > 225$) with or without a diagram is not sufficient. Award for 1 – 0.9726 or 1 – 0.9732 2^{nd} A1for 2.7 % or better (calculator gives 2.72) Allow awrt 0.027. Correct ans s			ect working.
		better seen]	
		1 st A1 for $Z > awrt$ 1.92/3. Allow a diagram but must have 1.92/3 and correct area i Must have the Z so P($X > 225$) with or without a diagram is not sufficient. Award for $1 - 0.9726$ or $1 - 0.9732$	
	(c)	1 st M1 for an attempt to standardise with 200 or 210, 205 and σ and set = \pm any z val B1 for z = 2.3263 (or better) and compatible signs. If B0 in (a) for using a value in [1.28, 1.29) but not using 1.2816: allow awrt 2 2 nd dM1 Dependent on the first M1 for correctly rearranging to make $\sigma =$ May b e.g. $\frac{5}{\sigma} = 2.32 \rightarrow \sigma = 2.16$ (M1A0) BUT must have $\sigma > 0$.33 here
	A1 for awrt 2.15. Must follow from correct working but a range of possible z values wi NB $2.320 < z \le 2.331$ will give an answer of awrt 2.15		alues will do.
