## Mark Scheme (Results)

## Summer 2015

Pearson Edexcel GCE in Statistics 1(6683/01)

## Edexcel and BTEC Qualifications

Edexcel and BTEC qualifications are awarded by Pearson, the UK's largest awarding body. We provide a wide range of qualifications including academic, vocational, occupational and specific programmes for employers. For further information visit our qualifications websites at www.edexcel.com or www.btec.co.uk. Alternatively, you can get in touch with us using the details on our contact us page at www.edexcel.com/contactus.

## Pearson: helping people progress, everywhere

Pearson aspires to be the world's leading learning company. Our aim is to help everyone progress in their lives through education. We believe in every kind of learning, for all kinds of people, wherever they are in the world. We've been involved in education for over 150 years, and by working across 70 countries, in 100 languages, we have built an international reputation for our commitment to high standards and raising achievement through innovation in education. Find out more about how we can help you and your students at: www. pearson.com/uk

## General Marking Guidance

- All candidates must receive the same treatment. Examiners must mark the first candidate in exactly the same way as they mark the last.
- Mark schemes should be applied positively. Candidates must be rewarded for what they have shown they can do rather than penalised for omissions.
- Examiners should mark according to the mark scheme not according to their perception of where the grade boundaries may lie.
- There is no ceiling on achievement. All marks on the mark scheme should be used appropriately.
- All the marks on the mark scheme are designed to be awarded. Examiners should always award full marks if deserved, i.e. if the answer matches the mark scheme. Examiners should also be prepared to award zero marks if the candidate's response is not worthy of credit according to the mark scheme.
- Where some judgement is required, mark schemes will provide the principles by which marks will be awarded and exemplification may be limited.
- Crossed out work should be marked UNLESS the candidate has replaced it with an alternative response.

## PEARSON EDEXCEL GCE MATHEMATICS

## General Instructions for Marking

1. The total number of marks for the paper is 75
2. The Edexcel Mathematics mark schemes use the following types of marks:

- M marks: Method marks are awarded for 'knowing a method and attempting to apply it', unless otherwise indicated.
- A marks: Accuracy marks can only be awarded if the relevant method (M) marks have been earned.
- B marks are unconditional accuracy marks (independent of $M$ marks)
- Marks should not be subdivided.

## 3. Abbreviations

These are some of the traditional marking abbreviations that will appear in the mark schemes.

- bod - benefit of doubt
- ft - follow through
- the symbol $\sqrt{ }$ will be used for correct ft
- cao - correct answer only
- cso - correct solution only. There must be no errors in this part of the question to obtain this mark
- isw - ignore subsequent working
- awrt - answers which round to
- SC: special case
- oe - or equivalent (and appropriate)
- d... or dep - dependent
- indep - independent
- dp decimal places
- sf significant figures
-     * The answer is printed on the paper or ag- answer given
- $\square$ or d... The second mark is dependent on gaining the first mark

4. All A marks are 'correct answer only' (cao.), unless shown, for example, as A1 ft to indicate that previous wrong working is to be followed through. After a misread however, the subsequent A marks affected are treated as A ft, but manifestly absurd answers should never be awarded A marks.
5. For misreading which does not alter the character of a question or materially simplify it, deduct two from any $A$ or $B$ marks gained, in that part of the question affected.
6. If a candidate makes more than one attempt at any question:

- If all but one attempt is crossed out, mark the attempt which is NOT crossed out.
- If either all attempts are crossed out or none are crossed out, mark all the attempts and score the highest single attempt.

7. Ignore wrong working or incorrect statements following a correct answer.

## Special notes for marking statistics exams

(a) If a method leads to "probabilities" which are greater than 1 or less than zero then M0 should be awarded unless the mark scheme specifies otherwise.
(b) Any correct method should gain credit.
(c) For method marks we generally allow or condone a slip or transcription error if these are seen in an expression. Typical examples on this paper are: Qu 4 where 225 is used instead of 255 or in Qu 5 where 255 is used instead of 225. Also in Question 5(e) and 5(f) 0.064 often becomes 0.64 and in 6(b) 0.625 becomes 0.0625

We do not condone or allow these errors in accuracy marks though.

| Question | Scheme | Marks |
| :---: | :---: | :---: |
| 3. (a) |  | B1 M1 A1 A1 B1 |
| (b) | $\frac{13 '}{80} \quad \text { or } 0.1625$ | B1ft |
| (c) | $\frac{28+30-11}{80} \text { or } \frac{2+3+4+8+13+17}{80} \text { or } 1-\frac{(11+22)}{80}=\frac{47}{80} \text { or } 0.5875$ | M1 A1 |
| (d) | $\frac{" 17+8+13 "}{447 "}$ or $\frac{\frac{\text { "38" }}{80}}{\frac{847 "}{80}}$ or $1-\frac{" 2+3+4 "}{477^{4}}=\frac{38}{47}$ (condone awrt 0.809 ) | M1 A1cao |
| (e) | $\begin{aligned} & \mathrm{P}(B \mid C)=\frac{7}{28}, \mathrm{P}(B)=\frac{20}{80} \\ & \mathrm{P}(C \mid B)=\frac{7}{20}, \mathrm{P}(C)=\frac{28}{80} \\ & \mathrm{P}(B \cap C)=\frac{7}{80}, \mathrm{P}(B)=\frac{20}{80} \mathrm{P}(C)=\frac{28}{80} \end{aligned}$ <br> $\mathrm{P}(B \mid C)=\mathrm{P}(B), \mathrm{P}(C \mid B)=\mathrm{P}(C)$ these may be implied by correct conclusion $\mathrm{P}(B \cap C)=\mathrm{P}(B) \times \mathrm{P}(C)$ this approach requires the product to be seen So, they are independent. | M1 <br> M1 <br> A1 (3) <br> (13 marks) |
|  | Notes |  |
| (a) | B1 for 3 intersecting circles with 3 in the centre. Allow probs. or integers in diagram. M1 for some correct subtraction e.g. at least one of $2,4,8$ or for $B$ : $20-$ their $(2+3+4)$ etc A1 for 2,4 and 8 (ignore labels) <br> A1 for 11,13 and 17 (must be in compatible regions with 2, 4, 8 if no labels) <br> B1 for correct labels and 22 and box (Do not treat "blank" as 0 so can't use 0 for ft in (c)) <br> M1 for a correct expression seen in (c) ( or ft their diagram). Correct ans M1A1 <br> M1 for denominator of 47 or ft their numerator from part (c) and numerator of 38 or their $(17+8+13)$ or (their 47$)-$ their $(2+3+4)$. Correct ans M1A1 <br> M1 for stating at least the required probs.\& labelled for a correct test (can ft their diagram) M1 for use of a correct test with $B$ and $C$ Must see product attempted for $\mathrm{P}(B \cap C)$ test. A1 for a correct test with all probabilities correct and a correct concluding statement. NB M0M1A0 should be possible but A1 requires both Ms |  |
