## edexcel

Mark Scheme (Results)
Summer 2015

Pearson Edexcel International GCSE
Physics (4PH0) Paper 1P
Science Double Award (4SC0) Paper 1P
Pearson Edexcel Level 1/Level 2 Certificate Physics (KPHO) Paper 1P
Science (Double Award) (KSC0) Paper 1P

## Edexcel and BTEC Qualifications

Edexcel and BTEC qualifications are awarded by Pearson, the UK's largest awarding body. We provide a wide range of qualifications including academic, vocational, occupational and specific programmes for employers. For further information visit our qualifications websites at www.edexcel.com or www.btec.co.uk. Alternatively, you can get in touch with us using the details on our contact us page at www.edexcel.com/contactus.

## Pearson: helping people progress, everywhere

Pearson aspires to be the world's leading learning company. Our aim is to help everyone progress in their lives through education. We believe in every kind of learning, for all kinds of people, wherever they are in the world. We've been involved in education for over 150 years, and by working across 70 countries, in 100 languages, we have built an international reputation for our commitment to high standards and raising achievement through innovation in education. Find out more about how we can help you and your students at: www. pearson.com/uk

## General Marking Guidance

- All candidates must receive the same treatment. Examiners must mark the first candidate in exactly the same way as they mark the last.
- Mark schemes should be applied positively. Candidates must be rewarded for what they have shown they can do rather than penalised for omissions.
- Examiners should mark according to the mark scheme not according to their perception of where the grade boundaries may lie.
- There is no ceiling on achievement. All marks on the mark scheme should be used appropriately.
- All the marks on the mark scheme are designed to be awarded. Examiners should always award full marks if deserved, i.e. if the answer matches the mark scheme. Examiners should also be prepared to award zero marks if the candidate's response is not worthy of credit according to the mark scheme.
- Where some judgement is required, mark schemes will provide the principles by which marks will be awarded and exemplification may be limited.
- When examiners are in doubt regarding the application of the mark scheme to a candidate's response, the team leader must be consulted.
- Crossed out work should be marked UNLESS the candidate has replaced it with an alternative response.

| Question <br> number | Answer | Notes | Marks |
| :--- | :--- | ---: | ---: |
| 1 (a) | A fission |  | 1 |
| (b) | A-absorbing some of the neutrons |  | 1 |

| Question number | Answer | Notes | Marks |
| :---: | :---: | :---: | :---: |
| 2 (a) (i) <br> (ii) | $\begin{aligned} & 6(\mathrm{~m} / \mathrm{s}) \\ & 10(\mathrm{~s}) \end{aligned}$ |  | 1 1 |
| (b) (i) <br> (ii) | $\text { Acceleration }=\frac{\text { change in velocity }}{\text { time (taken) }} ;$ <br> Substitution in correct equation; <br> Evaluation; <br> Unit; $\begin{aligned} & \text { e.g. } 12 \div 10 \\ & =1.2 \\ & \mathrm{~m} / \mathrm{s}^{2} \end{aligned}$ | allow accepted symbols <br> $\mathrm{ms}^{-2}$ <br> condone $\mathrm{m} / \mathrm{s} / \mathrm{s}$ | 1 3 |
| (c) (i) <br> (ii) | (average) speed $=\frac{\text { distance }(\text { moved })}{\text { time }}$; <br> Substitution in correct equation; <br> Evaluation; <br> e.g. $390 \div 60$ <br> $6.5(\mathrm{~m} / \mathrm{s})$ | allow accepted symbols $\begin{aligned} & (388.5 \div 60= \\ & 6.475) \end{aligned}$ | 1 2 |
| (d) | MP1 Idea that distance is given by area under the graph; <br> MP2 Comparison of the two areas (by eye or by calculation); | ignore steepness of lines, velocity, acceleration, width <br> NOTE: a valid comparison that includes MP1 + MP2 gains both marks e.g. the first 30s area is larger than the last 30 s | 2 |

Total 11 marks

| Question number | Answer | Notes | Marks |
| :---: | :---: | :---: | :---: |
| 4 | Max of three electrical hazards identified;;; <br> Max of three amplifying details relevant to the hazard(s) identified;;; <br> MP1. Idea of water in contact with something electrical e.g. plugs/sockets/switches; <br> MP2. Idea that an electrical device with a heating element reaches a high temperature; <br> MP3. Idea that damaged equipment poses a hazard; e.g. microwave oven <br> MP4. Idea overloaded cables or sockets; <br> MP5. Idea of trip hazard from trailing cables; | Max of 2 amplifications for any one hazard. <br> A repeated amplification can only be credited once e.g. shock, fire, provide plenty of sockets <br> e.g. <br> Idea that water conducts electricity; <br> Idea that this can cause shock; <br> (risk of ) burns; <br> idea that insulation can melt and cause a fire; <br> Live parts should not be exposed; Idea that this can cause shock; leaky microwave radiation can cause cancer; <br> circuits should have correct fuses; <br> can cause a fire; <br> don't use multiway socket extensions; provide sufficient sockets; <br> Do not use extension cables; Provide sufficient sockets; Use short mains leads; NOTE | 6 |

|  | MP6. Idea of misusing <br> equipment e.g. sticking metal <br> objects into a socket or <br> exposed heating element; | Appropriate training/safety <br> regime, e.g. use of 'blanks' <br> to cover sockets that <br> children can reach; <br> Idea that this can cause <br> shock; <br> Use proper (insulated) <br> tools; |  |
| :--- | :--- | :--- | :--- |
|  |  |  |  |

| Question number | Answer | Notes | Marks |
| :---: | :---: | :---: | :---: |
| 5 (a) | Any two of - <br> MP1. mention of no zero error; <br> MP2. Mention that ruler is should be vertical; <br> MP3. use of a fiducial marker; <br> MP4. use of ruler with finer calibrations; <br> MP5. means to reduce parallax; <br> MP6. use of calliper; | I gnore (more) accurate ruler <br> e.g. a pin Allow <br> - more detailed ruler <br> - smaller intervals ignore proximity | 2 |
| (b) (i) <br> (ii) | Distance <br> Any two of - <br> MP1. Idea of weight is the force on the mass / W=mg ; <br> MP2. change grams to kilogram; <br> MP3. 1 N of force for every 100 g ; <br> MP4. g is $10(\mathrm{~N} / \mathrm{kg})$; | in any form including numerical <br> Accept $\div 1000$ <br> Ignore $\div 100$ without further explanation <br> Allow idea of gravitational field strength <br> Accept $\times 10$ | 1 2 |

Continued

| Question number | Answer | Notes | Marks |
| :---: | :---: | :---: | :---: |
| 5 (b) (iii) <br> (iv) <br> (iv) <br> (v) | Suitable linear scale chosen ( $>50 \%$ of grid used); <br> Axes labelled with quantities and unit; <br> Plotting correct to nearest half square (minus one for each plotting error); ; Line of best fit acceptable; <br> straight line seen extended to the force axis; $1.40 \leq \mathrm{F} \leq 1.46 \text { (N); }$ <br> NO mark for Yes/No answer Any two of - <br> MP1. Correct statement of Hooke's law; <br> MP2. graph shows equal decrements for distance with force <br> MP3. (line goes down because) different distance has been measured; <br> MP4. graph does not pass through the origin; | no awkward scale <br> Orientation unimportant <br> i.e. two plotting errors $=$ no marks for plotting i.e. straight line <br> F value to 3 SF unless line goes through 1.40 accept force $=1.4$ <br> Answer in range = two marks <br> Allow <br> extension is (directly) proportional to force <br> - equal steps <br> - the line is straight ignore graph is directly proportional <br> - inversely proportional <br> - negative correlation <br> - the "wrong" distance is measured <br> - extension can be worked out from data <br> - more force $=$ larger extension | 5 |

| Question number | Answer | Notes | Marks |
| :---: | :---: | :---: | :---: |
| $6$ <br> (a) <br> (i) <br> (ii) | Any two of: <br> MP1. Idea of marking the line/points; <br> MP2. Idea of moving the compass (to a new point along the line); <br> MP3. Idea of starting a new line from a different place; <br> Any two of: MP1. Correct shape only; <br> MP2. lines not crossing each other; MP3. correct direction arrow shown on at least one line; | accept a labelled diagram allow use of iron filings use a compass allow <br> - tapping paper to line up iron filings <br> - multiple compasses <br> all field lines must be correct minimum of two curved lines of correct shape added anywhere in the field reject for MP3 any conflict of arrows | 2 |
| (b) | MP1 all field lines between the poles shown parallel and straight (by eye); <br> MP2 minimum of 3 straight lines evenly spaced (by eye) between the poles; MP3 Opposite poles shown adjacent; | ignore arrows can only be given if minimum of 2 lines shown | 3 |
