MARK SCHEME for the May/June 2007 question paper

0452 ACCOUNTING

0452/03   Paper 3, maximum raw mark 100

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began.

All Examiners are instructed that alternative correct answers and unexpected approaches in candidates' scripts must be given marks that fairly reflect the relevant knowledge and skills demonstrated.

Mark schemes must be read in conjunction with the question papers and the report on the examination.

- CIE will not enter into discussions or correspondence in connection with these mark schemes.

CIE is publishing the mark schemes for the May/June 2007 question papers for most IGCSE, GCE Advanced Level and Advanced Subsidiary Level syllabuses and some Ordinary Level syllabuses.

1 (a) Work can be shared between several people

Easier for reference as same type of accounts are kept together

Easier to introduce checking procedures

Or other suitable point

carriage outwards	150	750	
		14 250	
Less wages owing	200		
revaluation of equipment	3000		
bank charges	1050	4 250	
		10 000	

(b) (ii) Reliability   **[1]**
    (iii) Comparability   **[1]**
    (iv) Understandability   **[1]**

                                                                       [3]

(c) Financial information is only relevant if it can be used –

    To confirm or correct prior expectations about past events
    To assist in forming, revising or confirming expectations about the future
    As the basis for financial decisions

Explanation of any 1 point [2]   **[2]**

                                                                      [Total: 19]

5 **(a)** **(i)** Current ratio   70 000 : 40 000 = 1.75 : 1 **[1]**

       (ii) Quick ratio   (70 000 – 34 000) : 40 000 = 0.90 : 1 **[1]**

       (iii) Collection period for debtors $\dfrac{29\,000}{275\,000} \times \dfrac{365}{1}$ **[1]** = 39 days **[1]**

       (iv) Payment period for creditors $\dfrac{40\,000}{465\,000} \times \dfrac{365}{1}$ **[1]** = 32 days **[1]**   **[6]**

     (b) Does not include stock in the calculation **[1]**
        Either
        Stock is not regarded as a liquid asset – a buyer has to be found and then the money collected. Some stock may prove to be unsaleable. **[1]**
        Or
        The quick ratio shows whether the business would have any surplus liquid funds if all the current liabilities were paid immediately from the liquid assets. **[1]**   **[2]**

     (c) Satisfied if **(a) (ii)** is higher than the ratio for 2005
        Not satisfied if **(a) (ii)** is lower than the ratio for 2005   **[1]**

     (d) Increase in current liabilities greater than the increase in current assets
        Increase in creditors and no significant change in current assets
        Decrease in debtors and no significant change in current liabilities
        Decrease in bank and no significant change in current liabilities
        Decrease in stock and no significant change in current liabilities

        Or suitable response based on own figure calculation in (a) (i)

        Any 1 acceptable point [2]   **[2]**

     (e) **(i)** Not satisfied if **(a) (iii)** is more than the ratio for 2005
            Satisfied if (a) (iii) is less than the ratio for 2005   **[1]**

       (ii) Debtors are taking 9 days longer to pay than the previous year
            Or suitable explanation based on O/F answer to (a) (iii)   **[2]**

     (f) Debtors are taking longer to pay so this may have a knock-on effect and
        mean that the creditors may have to wait longer for their accounts to be paid.
        Or suitable explanation based on O/F answer to (a) (iii) and (a) (iv)   **[2]**

     (g) Rate of stock turnover   **[1]**

(h) The accounts may be for 1 year only and not show trends

The accounts may not be for a typical year

The financial year may end at a different point in the trading cycle

The businesses may operate different accounting policies e.g. depreciation

The accounts do not show non-monetary items but these are important in the success of a business

It is not always possible to obtain all the information about a business in order to make a true comparison

Or other suitable points

Any 3 correct points [1] each   **[3]**

[Total: 20]
